DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 9 and 13, in part, as drawn to a method of preventing or treating aberrant growth or inflammation comprising identification of a subject and increasing the amount or function of a p21CIP1 protein in the joint of a subject.

Group II, claims 10 and 14, in part, as drawn to a method of administering a p21CIP1 protein.

Group III, claims 11 and 15, in part, as drawn to a method of administering DNA encoding a p21CIP1 protein to a subject (gene therapy).

Group IV, claims 12 and 16, in part, as drawn to a method of administering a compound.

Group V, claims 17-24, drawn to a method of screening for a compound that inhibits aberrant growth of inflammation or synovial tissue.

Group VI, claims 13-16, in part, and 25, as drawn to a method of treating rheumatoid arthritis in a subject.

2. The inventions listed as Groups I and VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: claim 1 lacks novelty under PCT Article 33(2) as being anticipated by Sugiyama *et al.*, Localisation of apoptosis and expression of apoptosis related proteins in the synovium of patients with rheumatoid arthritis. Ann Rheum Dis 1996 July 55(7):442-9. Sugiyama *et al.*, disclose a apoptosis specific morphology and expression of p21/CIP1 in rheumatoid arthritis synovial tissue (see entire article). The Sugiyama *et al.*, reference meets the limitations recited in claim 1. Restriction is required under 35 U.S.C. 121 and 372.

Art Unit: 1647

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
